4	Reserves	6

<p>1.</p>	<p>Introduction</p> <p>Liquidity, Reserves and Investments Policy, are required to be managed to accrue value for the Hospice whilst ensuring sufficient funds are available if certain risks crystallise. Each year the Trustees will review the Liquidity, Reserves and Investments Policy to ensure that the levels set remain valid and relevant to the needs of the Hospice. In reviewing these policies the Trustees will be informed by the review of the overall Risk Assessment and any new developments.</p>
<p>2.</p>	<p>Liquidity</p> <p>The Hospice position on liquidity and the holding of reserves is that:</p> <ul style="list-style-type: none"> • The Hospice generates income to provide services in line with its charitable purposes. Money should only be held in reserve where it is to cover known liabilities, projected developments and to reasonably underpin long term security for the organisation and the users of its services. • The Hospice must seek to retain sufficient liquid reserves to meet its day to day commitments and its contingent liabilities. • The Hospice shall hold money available to assist the day to day cash-flow situation and to provide a level of cover in extreme and immediate circumstances. The level of that sum, proportionate to the level of funds held in other forms will be determined by the Trustees as set out above. • Liquid funds will be held in Bank accounts and Building Society time deposit accounts where they are accessible within short periods and where despite that they are capable of generating a reasonable level of interest. • Liquid funds will be held in a variety of such accounts and re-invested regularly to ensure availability and return in line with our current market rates. • The funds held in liquid forms in Time Deposits and Bank Accounts will be managed by the Chief Executive Officer and the Director of Finance and Resources on behalf of the Trustees.

3. Investment

The Hospice position on the holding of investment is that:

- The Hospice must seek to ensure that a proportion of its funds are invested for growth, so as to prevent erosion of the capital value of the monies entrusted to the Trustees for the furtherment of the aims of the charity.
- The investment of Hospice funds in medium and long term investments requires skill and expertise of professionals in the sphere of investment management. The Hospice Trustees will seek advice from suitably qualified and experience professional persons when making such investments.

The principal set down above, the requirements of the Trustee Investment Act and the guidance of the Charity Commission, require that:

- The Strategy and Coprate Governance Committee (SCG)r shall determine both the level of investment and the level of risk of those investments.
- The SCG shall provide guidance in writing to any person engaged in making investments on the Hospices behalf. That guidance shall include the absolute amounts to be invested, the levels of risk which any portfolio of investments should cover and any guidance about areas of investment that the Board of Trustees believe would be in conflict with the aims and objectives of the charity.

The second principal acknowledges the necessity of engaging skilled professional advice in order to optimise the opportunity of investment. The Hospice must establish processes to follow up the guidance given to such professionals and to regularly review the nature, content and out-turn of the investment portfolio held on the Hospices behalf. To that end the follow process shall be set in place:

	<ul style="list-style-type: none"> • The SCG will oversee and manage the process of investment that is being handled on behalf of the Hospice by external professional brokers. That committee must include the Honorary Treasurer in post at the time. • The SCG will review the position in respect of those medium and longer term investments on behalf of the wider Trustee body. The Director of Finance and Resources will report on the current state of the investments at the regular meetings of the Hospice Board of Trustees and there shall be a standing item on the agenda for the purposes of such reporting.
<p>4.</p>	<p>Reserves</p> <p>The financial budget adopted at the Board of Trustees each financial year will set up certain principals for the management of reserves.</p> <ul style="list-style-type: none"> • The Hospice must seek to retain sufficient liquid reserves to meet its day to day commitments and contingent liabilities. • The Hospice must seek to ensure that a proportion of its funds are invested for growth, so as to prevent erosion of the capital value of the monies entrusted to the Trustees for the furtherment of the aims of the charity. <p>The Board of Trustees will determine and agree the appropriate level of investment in line with the Strategic Development Plan, the Risk Assessment and the Financial Strategy.</p>
